PROFESSIONAL SUMMARY

Motivated and technology-driven Computer Science student pursuing a Bachelor of Science in Computer Science at DMI St John the Baptist University, Mangochi Campus. Interested in software development, data analysis, information systems, and emerging technologies.

Possesses practical experience in developing software applications, designing user interfaces, working with databases, and applying programming concepts to solve real-world problems. Has participated in technology-based projects involving business management systems, ticketing platforms, and data mining.

A proactive learner with strong problem-solving abilities, adaptability, and an interest in continuously developing technical and professional skills.

EDUCATION

Bachelor of Science in Computer Science
DMI St John the Baptist University – Mangochi Campus
2024 – Present

Relevant Coursework:

- Data Structures and Algorithms
- Database Management Systems
- Python Programming
- Operating Systems
- Computer Networks
- Discrete Mathematics

- Artificial Intelligence
- Software Development

TECHNICAL SKILLS

Programming Languages

- Python
- JavaScript / TypeScript
- Java

Web and Application Development

- React
- React Native
- Expo
- Streamlit
- HTML and CSS

Databases and Data Processing

- Database design and management
- Data preprocessing
- Data mining
- Association rule mining
- SQL

Development Tools

- Visual Studio Code
- Android Studio
- Git and GitHub
- Figma
- Microsoft Office

Other Technical Competencies

- User interface and user experience design
- Software testing and debugging
- System analysis and design
- Data visualization
- Responsive application development

PROFESSIONAL EXPERIENCE

IT Intern – MlimiPay
[Internship Period]

- Gained practical exposure to working within a technology-focused organization.
- Participated in activities related to information technology and software-based solutions.
- Developed an understanding of professional IT workflows and workplace collaboration.
- Applied academic knowledge to practical technology-related tasks.

PROJECTS AND PRACTICAL EXPERIENCE

1. Market Basket Analysis System

Developing a data mining-based system for identifying customer purchasing patterns and product associations in retail transactions.

Key contributions:

- Implementing Apriori and FP-Growth algorithms for frequent itemset mining.
- Applying association rule mining using support, confidence, and lift.
- Developing an interactive application using Python and Streamlit.
- Creating data visualizations and algorithm performance comparisons.
- Implementing an AI interpretation layer to explain data mining results.

Technologies: Python, Streamlit, Pandas, Data Mining, Apriori, FP-Growth.

2. AspiringFX Trading Journal Application

Designing a mobile application that combines trade journaling and ICT trading tools.

Key contributions:

- Designing a mobile-first user interface.
- Developing the application using React Native and Expo.
- Planning trade tracking, performance analysis, and trading psychology features.
- Integrating ICT trading macros and trading plan management.

Technologies: React Native, TypeScript, Expo.

3. Personal Portfolio Website

Designing and developing a personal portfolio website to showcase technical skills, projects, and professional achievements.

Key contributions:

- Developing responsive web interfaces.

- Implementing interactive animations and visual elements.
- Creating sections for professional information, projects, and CV access.

Technologies: React, JavaScript, HTML, CSS.

LEADERSHIP AND COLLABORATIVE EXPERIENCE

Oasis Tech Capital – Technology and Operations

Contributing to a technology-focused team involved in developing digital solutions.

Areas of involvement:

- Supporting technology product development.
- Contributing to product planning and coordination.
- Assisting with social media and digital communication.
- Participating in the development and improvement of digital platforms.

Projects include:

- Oasis EMS – Enterprise Management System.
- TicketMalawi – Digital ticketing and event management platform.

PERSONAL SKILLS

- Problem-solving and analytical thinking.
- Teamwork and collaboration.
- Communication skills.
- Creativity and innovation.
- Adaptability and willingness to learn.
- Time management and organization.
- Attention to detail.

PROFESSIONAL INTERESTS

- Software Engineering and Development.
- Artificial Intelligence and Machine Learning.
- Data Science and Data Mining.
- Mobile Application Development.
- Information Systems and Technology Innovation.
